OUT

This event displays the final results of a fourteen-month interdisciplinary collaboration involving eighteen students from the UvA, VU and Gerrit Rietveld Academie.

Departing from the overarching theme “Inner/Outer Transitions (of Being)” the students divided into groups to work on four separate sub-themes during the programme. The participants have worked closely together sharing knowledge and exchanging skills, researching their personal fascinations and establishing common grounds. The groups’ projects have unfolded by reflections upon symbolism, fetishism, death, and duration – concepts that have been explored through visual and performative experiments. In order to further

share their research with guests, a series of salons focusing on each project will be held by the students.
